

BlueCross BlueShield
of New Mexico

If a conflict arises between a Clinical Payment and Coding Policy and any plan document under which a member is entitled to Covered Services, the plan document will govern. If a conflict arises between a CPCP and any provider contract pursuant to which a provider participates in and/or provides Covered Services to eligible member(s) and/or plans, the provider contract will govern. "Plan documents" include, but are not limited to, Certificates of Health Care Benefits, benefit booklets, Summary Plan Descriptions, and other coverage documents. Blue Cross and Blue Shield of New Mexico may use reasonable discretion interpreting and applying this policy to services being delivered in a particular case. BCBSNM has full and final discretionary authority for their interpretation and application to the extent provided under any applicable plan documents.

Providers are responsible for submission of accurate documentation of services performed. Providers are expected to submit claims for services rendered using valid code combinations from Health Insurance Portability and Accountability Act approved code sets. Claims should be coded appropriately according to industry standard coding guidelines including, but not limited to: Uniform Billing Editor, American Medical Association, Current Procedural Terminology, CPT® Assistant, Healthcare Common Procedure Coding System, ICD-10 CM and PCS, National Drug Codes, Diagnosis Related Group guidelines, Centers for Medicare and Medicaid Services National Correct Coding Initiative Policy Manual, CCI table edits and other CMS guidelines.

Claims are subject to the code edit protocols for services/procedures billed. Claim submissions are subject to claim review including but not limited to, any terms of benefit coverage, provider contract language, medical policies, clinical payment and coding policies as well as coding software logic. Upon request, the provider is urged to submit any additional documentation.

Global Surgical Package-Professional Provider

Policy Number: CPCP014

Version: 1.0

Clinical Payment and Coding Policy Committee Approval Date: April 7, 2025

Plan Effective Date: April 15, 2025

Description

This policy serves as a reference for billing and coding for global surgical package and subsequent services provided within the global surgery days for professional health care provider claims. Providers are expected to exercise independent medical judgement in providing care to eligible members. This policy is not intended to impact care decisions or medical practice.

The global surgical package, also referred to as global surgery, includes all the related services and supplies that are routine and necessary to the procedure, rendered by a provider or another physician or other QHP within the same group and/or same specialty and sub-specialty, for preoperative, intra-operative, and post-operative services to the procedure. The global surgical package applies in any setting including inpatient hospital, outpatient hospital, Ambulatory Surgery Center (ASC) and a professional health care provider's office.

Health care providers are responsible for informing members how and where to access postoperative care as part of the hospital discharge planning. Reimbursement for postoperative services are included in the global professional reimbursement rate. Follow up care is rendered in the professional health care provider office setting.

This policy does not address all situations that may occur. In certain circumstances, there are situations which may override the criteria within this policy.

Reimbursement Information

The Plan reserves the right to request supporting documentation. Failure to adhere to coding and billing policies may impact claims processing and reimbursement.

Global Period

A **global period** is time that is pre-operative, intra-operative, and post-operative.

- For a list of all required CPT/HCPCS codes that should be reported for *Global Services* refer to the CMS website and/or the Medicare NCCI Policy Manual chapters that are applicable to the type of procedure performed. The Plan's claims payment systems utilize the CMS defined global periods, which vary according to the procedure being performed.

Pre-operative Visits are visits after the decision is made to operate beginning with either the day before the day of surgery for **major procedures**, or the day of surgery for **minor procedures**.

Intra-operative Services are services that are normally a usual and necessary part of a surgical procedure.

Post-operative Visits are follow-up visits during the post-operative period of the surgery that are related to recovery from surgery.

GLOBAL SURGICAL PACKAGE TYPE	CALCULATION	CRITERIA
MINOR SURGERY Endoscopies and some minor procedures Global Surgery Indicator 000	Day of surgery= Day 0	- No pre-operative period - No post-operative days - The visit on the day of the procedure is generally not payable as a separate service.
MINOR SURGERY Other minor procedures Global Surgery Indicator 010	Day of surgery and 10 days immediately after	- No pre-operative period - The visit on the day of the procedure is generally not payable as a separate service. - The total global period is 11 days. Count the day of the surgery and the 10 days immediately following the day of the surgery.
MAJOR SURGERY Major procedures Global Surgery Indicator 090	- Day before surgery= Day 0 - Day of surgery= Day 1 90 days immediately after	- One day pre-operative period - The visit on the day of the procedure is generally not payable as a separate service. - The global surgical package includes one preoperative day, the day of the procedure, and 90 days immediately following the day of the surgery, for a total global period of 92 days.

Services typically included in the global surgical package may become eligible for separate reimbursement if provided after the global period expires based on the post-operative days noted above. However, a procedure that has a Global Days Value of 000, 010, or 090 that is performed during the post-operative period of another procedure having a Global Days Value of 010 or 090, when both of the procedures are reported by the same surgeon, same specialty provider or another QHP, is considered included in the global surgical package of the initial procedure **unless** an appropriate modifier is appended.

Global surgical services may include, but are not limited to, the following:

- Pre-operative visits starting with the day before the surgery for a major procedure and the day of surgery for a minor procedure.
- Evaluation and management-E/M services for minor surgery on the day of the minor surgery is included in the Global Days Value 000-010.
- Local infiltration, tumescent anesthesia, metacarpal/metatarsal/digital block, or topical anesthesia.
- Intra-operative services usual and necessary to the surgical procedure. E.g., the administration of fluids and drugs during or for an operative procedure are included in the services and are not separately reimbursable. CPT codes 96360-96377 are not reported separately for the operative procedure.
- Immediate post-operative care, including dictating operative notes, talking with the family and other physicians or other qualified health care professionals.
- Writing orders.
- Evaluating the member in the post-anesthesia recovery area.
- Post-operative follow-up care during the post-operative period related to the recovery of the surgery. This includes follow-up E/M visits occurring within the designated global period **related** to the recovery following surgery. However, a significant and separately identifiable E/M service **unrelated** to the decision to perform a minor surgical procedure should be reported separately with modifier -25 appended.
- Surgical suite or anesthesia equipment.
- Postsurgical pain management when performed by the surgeon, same specialty/subspecialty physician or other QHP within the same group.
- Supplies – Except for those identified as exclusions.
- Miscellaneous Services - Items such as dressing changes; local incisional care; removal of operative pack; removal of cutaneous sutures and staples, lines, wires, tubes, drains, casts, and splints; insertion, irrigation and removal of urinary catheters, routine peripheral intravenous lines, nasogastric and rectal tubes; and changes and removal of tracheostomy tubes.
- Surgical trays are not eligible for separate reimbursement when certain services are performed in a professional health care provider's office.

Services not included in the Global Surgical Package

- Initial consultation or evaluation of the problem by the surgeon to determine the need for major surgeries.
- Services performed by other physicians with the exception where the surgeon and the other physician(s) agree on the transfer of care. In the event a member's care is transferred, documentation should be submitted for eligible reimbursement.
- Visits unrelated to the diagnosis for the surgical procedure performed unless the services are performed due to complications of the surgery.
- Treatment of the underlying condition or an added course of treatment which is not part of the normal recovery from surgery.

- Diagnostic tests and procedures including diagnostic radiological services.
- Clearly distinct surgical procedures during the post-operative period which are not a repeat operation or treatment for complications.
- Treatments for postoperative complications requiring a return trip to the operating room.
- If a less extensive procedure has failed and a more extensive procedure is required. The second procedure may be eligible for separate reimbursement.
- Immunosuppressive therapy for organ transplants
- Critical care services unrelated to the surgical procedure where a seriously injured or burned member is critically ill and requires constant attendance of the physician.

Split Surgical Package

A split surgical package is when the pre-operative and/or post-operative services are rendered by a physician or QHP other than the surgeon performing the surgical procedure. Appropriate modifiers should be appended to the same surgical procedure code by each physician or QHP to identify who provided the service(s) during the global surgical package.

Eligible reimbursement for a split surgical service must not exceed 100% of the total global surgical allowable amount.

Modifier	Percentage
54	75%
55	12.5%
56	12.5%
TOTAL	100%

HCPCS Add-on Code G0559

Time and/or resources associated with post-operative care during the 90-day global period that is rendered by a physician or other QHP who is not the provider who performed the surgical procedure, is not in the same group practice, and no formal transfer of care has been established. HCPCS add-on code G0559 is reported in addition to an office or outpatient E/M code without modifier 55.

Appending a Modifier

Modifiers should be appended to CPT/HCPCS codes to indicate the service **is or is not** part of the global period. Services that are separate from the global period may be eligible for reimbursement. Modifiers may have claims logic that impacts claim reimbursement.

Claim submissions may be denied if a claim contains an inappropriate modifier-to-

procedure code combination. In this case, a corrected claim submission with the correct modifier-to-procedure code combination will be required for reimbursement consideration.

Modifier 24 and/or 25 should not be appended to codes for services rendered during the global period when the medical records do not support the visits were separate and unrelated.

The following list includes modifiers that may be appended to indicate if a service **is or is not** part of a global surgical package. This is not an all-inclusive list:

MODIFIER	DESCRIPTION
24	Unrelated E/M service by the same physician or other QHP during a postoperative period
25	Significant, separately identifiable E/M service by the same physician or other QHP on the same day of the procedure or other service
54	Surgical care only
55	Post-operative management only
56	Pre-operative management only
57	Decision for surgery
58	Staged or related procedure or service by the same physician or other QHP during the postoperative period
76	Repeat procedure or service by same physician or other QHP
77	Repeat procedure by another physician or other QHP
78	Unplanned return to the operating/procedure room by the same physician or other QHP following initial procedure for a related procedure during the postoperative period
79	Unrelated procedure or service by the same physician or other QHP during the postoperative period
FT	Unrelated critical care E/M visit during a postoperative period, or on the same day as a procedure or another E/M visit (within the global surgical period but, is unrelated to the procedure, or when one or more additional E/M visits furnished on the same day are unrelated). The members medical records must clearly document critical care rendered was unrelated to the procedure. (Note, modifier -FT may only be appended to critical care code(s).)
